

**GENERAL PRODUCT INFORMATION:**

This product is ETL listed and suitable only for indoor dry locations and approved for use at any height above the finished floor.

**Adjust the Fixture Height**

**1** Cut the coaxial cable to the desired length with a sharp cutter. The overall fixture height (H) is measured from bottom of the glass shade to end of the coaxial cable.

**2** Insert the fixture coaxial cable through the conical connector.

**3** Insert the coaxial cable through the flared end of the strain relief.

**4** Slide the outer wrapped wire back to expose the inner wire.

**5** Strip 1/8" from end of the inner wire. **Make sure that the stripped portion is not greater than 3/16".**

**6** Loosen (**Do Not Remove**) the M4 set screw with the provided 2MM Allen wrench.

**7** Remove the M3 set screw with the provided 1.5MM Allen wrench.

**8** While inserting the inner wire into the connector look through the set screw hole to make sure that the stripped portion of the inner wire contacts end of the connector.

**9** Hold the coaxial cable in place; replace and tighten the M3 set screw with the 1.5MM Allen wrench. **Lightly** tug on the coaxial cable to make sure that the set screw connection is tight.

**10** The strain relief slots should be rotated 90° away from the M4 set screw.

**11** Slide and push the strain relief completely into the connector. This will force the outer wrapped wire to be inserted into the connector.

**12** Tighten the M4 set screw with the 2MM Allen wrench so that the strain relief holds the outer wrapped wire in place.

**13** Slide the conical connector over the fixture connector. To install the fixture, refer to the instructions provided with the system.

## Install the Lamp

**NOTE:** To reduce the risk of a burn or electric shock during relamping, disconnect the power to the fixture.

- 1 Lift the glass shade to expose the socket.

**NOTE:** Use only your fingers and soft cloth to replace the lamp.

Use **MAX 35 Watt** Type Xelogen (Xenon) Bi-Pin Lamp.

- 2 Push the lamp pins completely into the socket holes.
- 3 Lower the glass shade back onto the socket.

### **WARNING: RISK OF FIRE**

Never replace a Xenon (Xelogen) lamp with a regular Halogen lamp. A regular Halogen lamp requires a protective glass shield.

**SAVE THESE INSTRUCTIONS!**
